

### 2-Wire / 10GHz Radar (FMCW) Level Meter

### THE LOW-COST FMCW LEVEL RADAR

This device is a non-contact radar level meter that uses FMCW technology. It measures distance, level and volume of liquids and pastes. It is ideal for measuring the level of corrosive products with its PP or PTFE antenna options.

### **FEATURES**

- · PP or PTFE Wave Horn antennas for the measurement of corrosive products
- Modular design: horizontal or vertical position of housing is suitable for almost all installations
- Optional local display with an integrated 4-button keypad. It is not necessary to remove the housing cover to get access to the keypad.
- Quick coupling system permits removal of the housing under process conditions and rotation of the housing through 360°
- · Bayonet housing cover permits easy opening and closing of the housing, even after years in service
- Measuring range up to 30 m / 98.4 ft
- Converter is backwards compatible with all BM 70x flange systems
- · SIL2-compliant according to IEC 61508 for safety-related systems
- Each device is calibrated on dedicated calibration rigs before it leaves the factory
- · Universal measurement device for liquids, pastes and slurries

#### Industries

- Chemical market
- Oil & Gas
- Power
- Food
- Wastewater
- Metals, Minerals & Mining

#### **Applications - Level, Volume, and Flow**

- Storage tanks
- · Process tanks
- Open channel flow (if PACTware<sup>™</sup> software tool is used)

### **MODULAR DESIGN**

#### **Compact / Vertical version**

- The converter is vertical. It is attached directly to the process connection (compact version).
- For installation of the device on the ground or in a recess.
- The optional LCD display is attached to the top or the side of the device.

#### **Compact / Horizontal version**

- The converter is horizontal. It is attached directly to the process connection (compact version).
- This version is ideal for installation in areas with low roof clearances.
  - For locations where it is easier to read data on the optional LCD display if the converter is in a horizontal position.

#### **Remote version**

- Users can read measurements and configure the device from the bottom of the tank.
- The remote converter can be installed up to 100 m / 328 ft away from the process connection on the tank.
- Attach the remote converter to a wall, pipe or rigid surface with the supplied wall support.

#### Weather protection

- A weather protection option can also be ordered with the device. It is recommended for outdoor applications.
- Must be ordered with the device.
- Can be ordered for both compact versions of the device and the antenna housing of the remote version.
- Easily opened and closed.

### DR5200 - 2-Wire / 10GHz Radar (FMCW) Level Meter

### **APPLICATIONS**

#### **1. Level measurement of liquids**

The level meter can measure the level of a wide range of liquid products on a large variety of installations within the stated pressure and temperature range. It does not require any calibration: it is only necessary to do a short configuration procedure.

#### 2. Volume (mass) measurement

A strapping table function is available in the configuration menu for volume or mass measurement. Up to 30 volume (mass) values can be related to level values. For example:

Level 1=2 m / Volume  $1= \text{e.g. } 0.7 \text{ m}^3$ 

Level 2= 10 m / Volume 2= e.g. 5 m<sup>3</sup>

Level 3= 20 m / Volume 3= e.g. 17 m<sup>3</sup>

This data permits the device to calculate (by linear interpolation) volume or mass between strapping table entries.

#### 3. Flow rate measurement

Flow rate measurement is available for field devices that are used with PACTware<sup>™</sup> software. A flow rate conversion function is in the DTM supplied with the device. Make a selection from 6 flow profiles: Parshall (ISO 9826), Venturi Rectangular (ISO 4359), Venturi Trapezoidal (ISO 4359), Venturi U (ISO 4359), V-Notch (ISO 1438) or Rectangular Notch (ISO 1438).

### ANTENNA SELECTION

The graphs below show which antenna to select for the application based on:

- D, the measuring range,
- ε<sub>r</sub>, is the dielectric constant of the product being measured

Figure 1-1: Selection of antenna (graph of distance in m against  $\epsilon_r$ )

Figure 1-2: Selection of antenna (graph of distance in ft against  $\epsilon_r$ )

- 1 Tank height / Measuring range [m]
- 2 Tank height / Measuring range [ft]
- 3  $\epsilon_r$  for storage tanks with smooth product surface
- 4  $\epsilon_{r}$  for process tanks without agitator or foam
- 5 All antennas:
  - DN80/3" and DN100/4" Metallic Horn antenna: only for use in a stilling well\*
  - Wave Guide antenna: maximum measuring range is 6 m / 19.68 ft
- 6 DN150/6" or DN200/8" Metallic Horn antennas in a stilling well\* or DN200/8" Metallic Horn antenna
- 7 DN200/8" Metallic Horn antenna in a stilling well\*

\* A stilling well is equivalent to the Wave Guide antenna option or a bypass chamber

Measuring system							
Measuring principle	2-wire loop-powered level transmitter; X-band (10 GHz) FMCW radar						
Application range	Level measurement of liquids, pastes and slurries						
Primary measured value	Distance and reflection						
Secondary measured value	Level, volume, mass and flow rate						
Design							
Construction	The measurement system consists of a measuring sensor (antenna) and a signal converter						
Options	Integrated LCD display (-20+60°C/ -4+140°F); if the ambient temperature is not in these limits, the display switches off automatically						
	High-temperature (HT) extension (if the process connection temperature is more than +150°C / +302°F - Metallic Horn antenna only)						
	Straight antenna extensions Max. Extension length, PTFE Wave Horn antenna: 300 mm / 11.8"; Max. Extension length, Metallic Horn antenna: 1000 mm / 39.4"						
	"S" antenna extension - only for DN150/6" and DN200/8" Metallic Horn antenna options						
	"L" (right angle) antenna extension - only for DN150/6" and DN200/8" Metallic Horn antenna options						
	Antenna purging system - only for DN150/6" and DN200/8" Metallic Horn antenna options						
	Heating / cooling system (with or without the antenna purging system) - only for DN150/6" and DN200/8" Metallic Horn antenna options						
	Signal cable for remote housing version (refer to cable properties in "Electrical connection: Remote device version")						
	Weather protection - for the compact version or the antenna housing (remote version). It cannot be ordered after delivery of the device.						
Max. Measuring range	PTFE and PP Wave Horn antennas: 20 m / 65.6 ft						
	DN80 / DN100 Metallic Horn antennas (installation only in stilling wells): 10 m / 32.8 ft						
	DN150 / DN200 Metallic Horn antennas: 30 m / 98.4 ft						
	Wave Guide antenna: 6m/ 32.8 ft						
	Also depends on the dielectric constant of the product and the installation type. Refer also to "Antenna selection".						
Min. tank height	1m/ 3.3 ft						
Top dead zone	Minimum value: Antenna length + antennna extension length + 100 mm / 3.9"						
Beam angle (½ angle) of antenna	PP Wave Horn: 10°						
	PTFE Wave Horn: 10°						
	Metallic Horn DN80 / 3": 16° - used only in stilling wells						
	Metallic Horn DN100 / 4": 12° - used only in stilling wells						
	Metallic Horn DN150 / 6": 8°						
	Metallic Horn DN200 / 8": 6°						
	Wave Guide / stilling well: n/a - the radar signal is inside the tube.

Housing, process connection and antenna options

#### Figure 2-15: Housing, process connection and antenna options

- **1** Housing options. From left to right: compact converter with horizontal housing, compact converter with vertical hous- ing, and remote converter (top) and antenna housing (bottom)
- 2 Process connection options. From left to right: flange connection for PTFE Wave Horn antenna, threaded connection for PP Wave Horn antenna, flange connection for Metallic Horn and Wave Guide antennas, flange connection with a high-temperature (HT) extension for Metallic Horn and Wave Guide antennas
- **3** Antenna options. From left to right: PTFE Wave Horn antenna, PP Wave Horn antenna, Metallic Horn antenna (with or without an antenna extension option: straight, "L" or "S" extension), Wave Guide antenna

All housing covers have bayonet connectors unless it is an explosion-proof (XP / Ex d-approved) device. The terminal compartment cover for explosion-proof devices has a thread with a flame path.
